

PARTNERS IN COLLABORATION

WHAT?

Partners In Collaboration (PIC) is an innovative cross-disciplinary project that builds cross-discipline training and skill-enhancement across the Early Childhood Education and the Early Childhood Mental Health fields. Participating Early Childhood Mental Health Consultants are paired with an Early Care and Education Practitioner for cross-discipline training. These same teams collaborate to provide integrated consultation to child care programs.

By working together, Early Childhood Education professionals and Early Childhood Mental Health consultants:

- Gain a shared perspective
- Integrate their areas of expertise
- Provide more comprehensive support to early care and education classrooms

WHO?

PIC accepts applications from ECE practitioners who currently provide technical assistance to child care providers in the community.

CONTACT INFORMATION:

If you are interested in participating in PIC, please contact:
